

Whatever you vividly imagine, ardently desire, sincerely believe, and enthusiastically act upon must inevitably come to pass!"

Paul J Meyer

This is one of our favorite quotes at IBB, as it's totally in keeping with our mission "to change the world"; we achieve this daily through our ongoing work with individuals, organizations and communities in the realization of their much desired dreams and goals.

We start with the premise that each individual we work with, regardless of their background or age, holds within them the power to make a positive difference.

It's time for some radical change in Trinidad and Tobago, time to collectively, proactively, positively and consistently work together towards a more sustainable and viable nation. We trust that today's initiative presents us with the opportunity to achieve this.

"The investment in young people is an investment in the future of our country."

IBB partner, Leadership Management International (LMI), now operating in over 85 countries across the globe has been successfully developing leaders for over 50 years. Following the organization's roll-out of the Total Leader Concept; a 4 program Leadership Development Series, the European Team, led by Germany, embarked upon an initiative to utilize the same approach for development of young people globally, hence the emergence of **LMI's Youth Leader Concept and Youth Globe Initiative, "100 Champions...!"**

This initiative seeks to engage public and private sector sponsors across the globe in the development of 100 Champions for each nation, tracking through longitudinal studies the impact of the development programs on the first 100 graduates of each country. Participating countries now include the United Kingdom, Germany, Austria, Switzerland, Russia and China, with the first 100 sponsors from each country also being recognized at global forums annually, the next forum to be held in Germany in September 2012.

With Trinidad and Tobago being the first Caribbean nation to roll-out the initiative, the support of all key stakeholders at this stage is absolutely critical. IBB is therefore calling upon all public and private sector corporations, schools and NGO's, parents, teachers and socially conscious and responsible citizens to assist us in rolling out these programs within the vast majority of our schools, if not all, so we can have within our nation a lifetime curriculum for children from as young as 2 years of age to 99.
